

SECTIONS

Theory and Methodology:

- Theoretical or empirical analysis of VNS
- New variants of deterministic and stochastic VNS
- Continuous global VNS
- Convergent VNS methods
- Matheuristics and VNS
- Formulation space VNS
- Multi-objective VNS
- Parallel VNS
- VNS hybrids

Applications:

- Mixed integer programming
- Graphs, communication networks
- Clustering, data mining, location
- Inventory, routing, supply chains
- Packing and covering
- Discovery sciences
- Other real world problems

- Sequential VND
- Nested VND
- Mixed VND
- Reduced VNS
- Basic VNS
- Skewed VNS
- General VNS
- Reactive VNS
- VNDs
- Primal-Dual VNS
- VN Branching
- VN Pump
- Formulation space VNS
- VN Simplex search
- Exterior VNS
- Recipe VNS

Accommodation in Hotel Plaza from 20.5 EUR only!

EUROmc - XXVIII - VNS

EURO Mini Conference XXVIII on Variable Neighbourhood Search

Herceg Novi, Montenegro, October 4-7, 2012
