

**A double VNS heuristic for the facility location and pricing problem**

*Z. Diakova, Yu. Kochetov*

**A General Variable Neighborhood Search heuristic for the Single Vehicle Routing Problem with Deliveries and Selective Pickups**

*I. M. Coelho, P. L. A. Munhoz, M. N. Haddad, M. J. F. Souza, L. S. Ochi*

**A Hybrid Metaheuristic Based on Variable Neighborhood Search and Tabu Search for the Web Service Selection Problem**

*Nina Turajlić, Ivana Dragović*

**A hybrid Particle Swarm Optimization - Variable Neighborhood Search Algorithm for Constrained Shortest Path Problems**

*Yannis Marinakis, Athanasios Migdalas, Angelo Sifaleras*

**A matheuristic approach for maximum lifetime coverage in wireless sensor networks under connectivity constraints**

*F. Castaño, A. Rossi, M. Sevaux, N. Velasco*

**A metaheuristic based approach for GNSS signal tracking**

*Marko Djogatović, Milorad Stanojević*

**A New Hybrid Model for Vector Job Scheduling**

*Nareys I Lawarance-Amaldas, Cormac Lucas*

**A new parallel variable neighborhood search for large p-median problem**

*Aleksandar Djenić, Marko Mladenović, Dragan Urošević*

**A New Variable Neighborhood Search Algorithm for the Multi Depot Heterogeneous Vehicle Routing Problem with Time Windows**

*Yingcheng Xu, Li Wang, Yuexiang Yang*

**A SA-VNS approach for the High School Timetabling Problem**

*Samuel S. Brito, George H. G. Fonseca, Tulio A. M. Toffolo, Haroldo G. Santos*

**A Simulated Annealing Algorithm within a Variable Neighborhood Search Framework to Solve the BMPG**

*Idelfonso Izquierdo-Marquez, Aldo Gonzalez-Gomez, Alberto Garcia-Robledo, Jose Torres-Jimenez*

**A Simulated Annealing with Variable Neighborhood Search Approach to Construct Mixed Covering Arrays**

*Arturo Rodriguez-Cristerna, Jose Torres-Jimenez*

**A Variable Neighbourhood Search approach to the Cutwidth Minimization Problem**

*Eduardo G. Pardo, Nenad Mladenović, Juan J. Pantrigo, Abraham Duarte*

**A Variable Neighborhood Search Algorithm for Multiobjective Optimization in Graph Theory**

*Gilles Caporossi, Snježana Majstorović*

**A variable neighborhood decomposition search algorithm for multilevel capacitated lot-sizing problems**

*QiuHong Zhao, Chao Xie, Yiyong Xiao*

**A Variable Neighbourhood Search filter**

*Marko Djogatović, Milorad Stanojević*

**A variable neighborhood search for a realistic university timetabling problem**

*M. Yazdani, B. Naderi*

**A variable neighborhood search for the multi-product multi-period inventory routing problem**

*Anis Mjirda, Bassem Jarboui, Rita Macedo, Said Hanafi*

**A Variable Neighbourhood Search for Solving the Yard Crane Scheduling Problem**

*Christopher Expósito Izquierdo, Belén Melián Batista, J. Marcos Moreno Vega*

**A Visual Environment to Study and Find Communities in Networks**

*Gilles Caporossi, Sylvain Perron*

**A VNS for the Close-Open VRPTW**

*Julio Brito, Airam Expósito, José A. Moreno*

**Adaptive differential evolution with crossover neighborhood search DE-CrNS**

*Darko Kovačević, Bratislav Petrović, Pavle Milošević*

**An analysis and empirical evaluation of different metaheuristic strategies for solving rich vehicle routing problems**

*Ulrich Derigs, Markus Pullmann*

**An efficient GVNS for solving Traveling Salesman Problem with Time Windows**

*Raca Todosijević, Dragan Urošević*

**An experimental comparison of VNS variants for the minimization of the vertex-cut in layout problems**

*Jesús Sánchez-Oro, Abraham Duarte*

**Applying Variable Neighborhood Search to the Single-machine Maximum Lateness Rescheduling Problem**

*Le Liu, Hong Zhou*

**Balancing Bicycle Sharing Systems by Variable Neighborhood Search**

*Günther R. Raidl, Emir Causevic, Bin Hu, Marian Rainer-Harbach*

**Clustering on the network using semantic similarities and VNS**

*Mladenović B, Todosijević R*

**Comparison of heuristics for solving very large nonlinear nonconvex problems**

*Darko Kovačević, Bratislav Petrović, Pavle Milošević*

**Computing low-energy homopolymer conformations by Branch-and-Prune and VNS**

*Antonio Mucherino, Leo Liberti, Carlile Lavor*

**Continuous Variable Neighborhood Search for parameters tuning in Support Vector Machines**

*Emilio Carrizosa, Belén Martín-Barragán, Dolores Romero Morales*

**Continuous VNS with modified Nelder Mead for non-differentiable optimization**

*Dražić M., Dražić Z., Urošević D., Zhao Q.*

**Degeneracy on K-means clustering**

*Abdulrahman Alguwaizani*

**Discovering Frequent Itemset with Maximum Time-Window on Temporal Transaction Database using Variable Neighborhood Search**

*Yiyong Xiao, Yun Tian, Qihong Zhao*

**Efficiency Evaluation of Business Friendly Certification Process in Serbia - Variable Neighborhood Search Approach**

*Žarko Popović, Vesna Janković-Milić, Jelena Stanković*

**Estimation for double Pareto Lognormal mixtures**

*Emilio Carrizosa, Pepa Ramirez Cobo, Jelena Jocković*

**Experiments with VNS on Multi-objective Vehicle Routing Problems**

*Juan Castro-Gutierrez, Dario Landa-Silva, José A. Moreno-Pérez*

**Exploiting Separators for Guiding VNS**

*Samir Loudni, Mathieu Fontaine, Patrice Boizumault*

**Fitting Censored Quantile Regression by Variable Neighbourhood Search**

*Rajab R.S., Dražić M., Yu K.*

**Fitting Censored Mode Regression by Variable Neighbourhood Search**

*Wei Dang, Keming Yu*

**Gaussian Variable Neighborhood Search and Enhanced Genetic Algorithm for Continuous Optimization**

*Ivan Nešić, Aleksandar Rakićević, Ana Poledica, Bratislav Petrović*

**General variable neighborhood search for Capacitated arc routing**

*Stanojević M., Todosijević R.*

**Generating good starting solutions for the p-median problem in the plane**

*Jack Brimberg, Zvi Drezner, Nenad Mladenovic, Said Salhi*

**GENVNS-TS-CL-PR: A heuristic approach for solving the vehicle routing problem with simultaneous pickup and delivery**

*Cruz R. C., Silva T. C. B., Souza M. J. F., Coelho V. N., Mine M. T., Martins A. X.*

**Global Approaches to Solving Min-Max-Location Problems**

*Emilio Carrizosa, Jonas Harbering*

**Hybrid Metaheuristic for Bicluster Editing Problem**

*Gilberto F. de Sousa Filho, Lucidio dos Anjos F. Cabral, Luiz Satoru Ochi, Fábio Pratti*

**Hybrid-VNS for the Tactical Berth Allocation**

*Eduardo Lalla Ruiz, Belén Melián Batista, J. Marcos Moreno Vega*

**Metaheuristic methods for solving the Bilevel Uncapacitated Facility Location Problem with Clients' Preferences**

*Miroslav Marić, Zorica Stanimirović, Nikola Milenković*

**Minimizing Total Weighted Earliness and Tardiness on an m-StageFlowshop Using VNS**

*Rym M'Hallah*

**MPI Parallelization of Variable Neighborhood Search**

*Tatjana Davidović, Teodor Gabriel Crainic*

**Multi-objective approaches for the open-pit mining operational planning problem**

*V. N. Coelho, M. J. F. Souza, I. M. Coelho, F. G. Guimaraes, T. Lust, R. C. Cruz*

**New Hybrid Variable Neighborhood-Tabu Search heuristic for Vehicle Routing Problems with Multi-Time Windows**

*Slim Belhaiza, Pierre Hansen, Gilbert Laporte*

**On Estimation of Number of Local Optima**

*Anton V. Ereemeev, Sergey A. Klovov, Colin R. Reeves*

**Packing Unit Spheres into a Cube Using VNS**

*Rym M'Hallah, Abdulaziz Alkandari*

**Patent Mapping in Can Manufacture**

*Keming Yu, Vincent Li, Milan Dražić, Mark Atherton, David Harrison*

**SearchCol based on VNS**

*Filipe Alvelos, Dorabella Santos, Amaro de Sousa*

**Solving a location-allocation problem under congestion and uncertainty using variable neighborhood search**

*Ebrahim Teimoury, Ragheb Rahmaniani, Abdolsalam Ghaderi, Shirin Ghalambor*

**Solving Multifacility Huff Location Models on Networks Using Variable Neighborhood Search and Multi-Start Local Search Metaheuristics**

*Sanja Roksandić, Emilio Carrizosa, Dragan Urošević*

**Solving the minimum labelling spanning tree problem using intelligent optimization**

*S. Consoli, J. A. Moreno Pérez*

**Solving the minimum labelling spanning tree problem using hybrid local search**

*S. Consoli, J. A. Moreno Pérez*

**Solving the Nonlinear DEA model by continuous Variable neighborhood search**

*Savić G., Martić M.*

**Time series interpolation via a moments matching method**

*Emilio Carrizosa, Alba V. Olivares-Nadal, Pepa Ramírez-Cobo*

**Variable neighborhood descent heuristic for covering design problem**

*Nebojša Nikolić, Igor Grujičić, Đorđe Dugošija*

**Variable Neighborhood Search and Tabu Search for the Web Service Selection Problem**

*Nina Turajlić, Siniša Nešković*

**Variable Neighborhood Search applied to the construction of MCAs**

*Loreto Gonzalez-Hernandez, Jose Torres-Jimenez, Nelson Rangel-Valdez*

**Variable neighborhood search approach for Machine reassignment**

*Bassem Jarboui*

**Variable Neighborhood Search for dynamic memory allocation in embedded systems**

*María Soto, André Rossi, Marc Sevaux*

**Variable Neighborhood Search for edge-ratio network clustering**

*Sonia Cafieri, Pierre Hansen, Nenad Mladenović*

**Variable Neighborhood Search for Google Machine Reassignment problem**

*Haris Gavranović, Mirsad Buljubašić*

**Variable neighborhood search for Minimum Linear Arrangement Problem**

*Dionisio Pérez-Brito, Dragan Urošević, Nenad Mladenović*

**Variable neighborhood search for Multiple Level Warehouse Layout Problem**

*Dragan Matić, Jozef Kratica, Vladimir Filipović, Đorđe Dugošija*

**Variable Neighborhood Search for Solving the Balanced Location Problem**

*Jozef Kratica, Markus Leitner, Ivana Ljubic*

**Variable Neighborhood Search for The attractive traveling salesman problem**

*Raca Todosijević, Dragan Urošević*

**Variable neighborhood search for the strong metric dimension problem**

*Jozef Kratica, Vera Kovačević-Vujčić, Mirjana Čangalović*

**Variable neighborhood search method for optimizing the emergency service network of police special forces units**

*Igor Grujičić, Zorica Stanimirović*

**VND for the uncapacitated  $r$ -allocation  $p$ -hub median problem**

*Juanjo Peiró, Ángel Corberán, Rafael Martí*

**VNS Approach for the Cumulative Capacitated Vehicle Routing Problem**

*Samuel Moisés Nucamendi Guillén, Francisco Román Ángel-Bello Acosta, J. Marcos Moreno-Vega*

**VNS based algorithm for solving a 0–1 nonlinear nonconvex model for the Collision Avoidance in Air Traffic Management**

*A. Alonso-Ayuso, L.F. Escudero, F.J. Martín-Campo*

**VNS based heuristic for solving Unit Commitment problem**

*Raca Todosijević, Marko Mladenović, Said Hanafi*

**VNS for the Antibandwidth Problem**

*Francisco Gortázar, Manuel Lozano, Abraham Duarte, Rafael Martí*

**VNS for the Dynamic Vehicle Routing Problem with Time Windows**

*Alondra De Santiago, Belén Melián, Ada Álvarez, David Pelta*

**VNS for the maximally diverse grouping problem**

*Micael Gallego, Abraham Duarte, Manuel Laguna, Rafael Martí*

**VNS heuristic for the  $(r | p)$  - centroid problem on the plane**

*I. Davydov, Yu. Kochetov, E. Carrizosa*

**VNS for the University Carpooling Problem**

*Sanja Roksandić, Tatjana Davidović, Maurizio Bruglieri*
